

JET BOATS

 OVERGAARD
SJX BOATS

**SJX JET BOATS WITH SUPERIOR POWER-TO-WEIGHT RATIO,
UNMATCHED SHALLOW WATER CAPABILITIES
AND BRUTAL ACCELERATION**

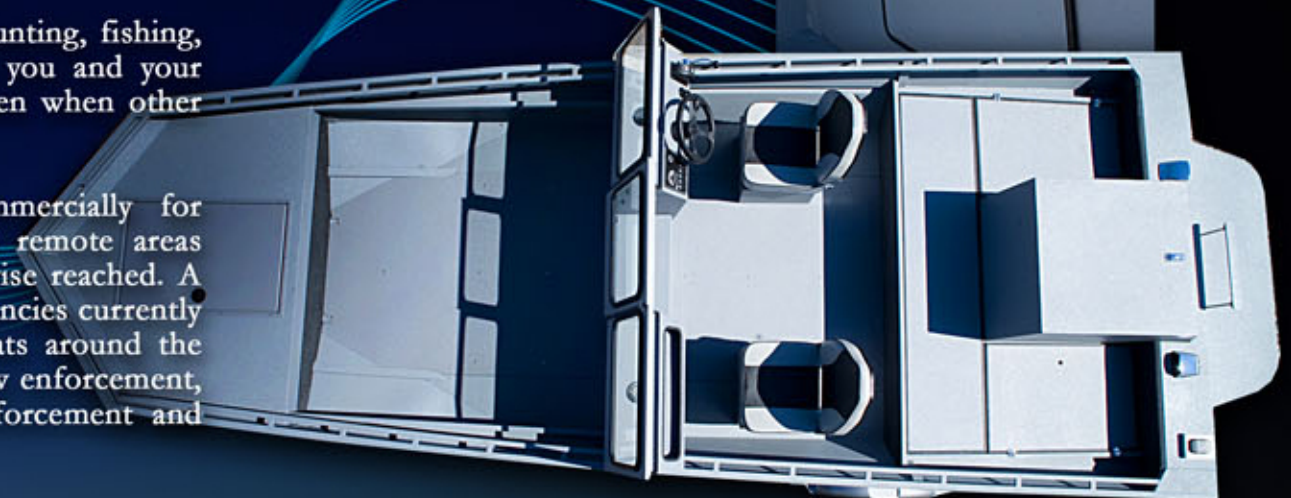

GENERAL INFORMATION

Overgaard in partnership with SJX Jet Boats Inc. manufacture jet boats for recreational and commercial usage. SJX's President has twenty five years experience in the aluminum boat industry, which has been instrumental in the realization and design of the SJX range of jet boats since 1998. In 2008, Overgaard was brought on board to assist with the manufacturing and retail of the jet boats in Asia.

The principle behind the SJX Jet Boats design is to provide the most sought after high performance yet lightweight tunnel hull jet boat in the world. The unmatched power to weight ratio, efficient fuel economy (range in excess of 195 nautical miles at average of 5.5gph), high working payload capability, shallow water (4" or less) abilities, high performance (continuous speed of 40 knots and accelerate to 25 knots in under 10 seconds) and impressive handling (180 degree turn in one boat length). SJX jet boats have a long and proven track record of new innovative products with proven designs. They are currently been utilized across North and South America, as well as around the world.

The SJX Jet Boats are do-all, touring, hunting, fishing, racing and working boats that will get you and your equipment wherever you want to go, even when other boats can not!

SJX Jet Boats are also utilized commercially for transferring equipment and supplies to remote areas around the world that cannot be otherwise reached. A number of militaries and government agencies currently operate and have deployed SJX Jet Boats around the world for border patrols, fire fighting, law enforcement, search and rescue, as well as drug enforcement and anti-terrorism.

SJX JET BOATS WITH TREMENDOUS PAYLOAD CAPABILITY, SUPERB HANDLING AND FUEL EFFICIENCY

“Reflections on Dworshak Reservoir, Orofino, Idaho.”

Delta, Alaska”

“...out of the water!”

SJ-X 2170

The SJ-X 2170 is the ultimate pleasure jet boat and comes with the following specification and equipment levels as standard:

Dimensions	Length	21ft (6,400mm)
	Width	70" (1,778mm)
	Height	27" (686mm - side height only)

Technical Mercury 200hp Optimax DFI SportJet Engine, Mercury Jet Drive SJ M2 Pump with stainless steel impeller, 40 Gallons (151.4 Litres) fuel tank with dual anti-surge/siphon venting system under raised rear deck, complete 500 gph bilge and blower system, 3 gallon (11.4 litres) 2-cycle oil reservoir tank, fuel / water separator system, high flow external mufflers and heater pipes and 24M-XHD 800CCA marine deep cycle interstate battery

Hull manufactured from 5052 marine grade aluminum sheet and 6061 custom extrusions. Hull bottom, boat sides and floor covers are all 1/8" (3.2mm) thick light weight but heavy duty construction.

Dual console with 3-piece windshield, custom switch panel, complete smart craft system, single leveler control shifter including neutral safety switch, hinged aluminum seat boxes with folding swivel seats, rear deck with hinged lids, large hinged bow hatch, extruded extended handrails, stainless steel EZ clean rock grate, transom eye's, weld-on zinc plate brackets, carpeted kick panels and wheel kit sockets.

Finish	Interior	Full Metal Jacket Bed Liner (Colour Options: Medium Grey, Red, Charcoal or Sand/Tan)
	Exterior	Full PDVF Paint (Colour Options: White, Black, Blue, Red, Green Graphite or Rambo-Camo (option))

Options Numerous options are available for sale with the jet boats, some of which are; rambo-camo paint, gateway single axle trailer, heater / defroster, hinged windshield, additional folding seats, trolling motor bracket and quick fuel connect, zinc anodes, wheel kit, bull winchell, folding top, side curtains and backdrop, bolt on rear railing, bow rope chalk mount, helm lever for EZ-Clean control.

The above options and more are available on request. Additional custom fabrication options are also available.

SJ-X XL WC

The SJ-X XL WC is the larger (24ft length) jet boat utilized more for commercial purposes. It comes with the same specification as the SJ-X 2170 jet boat with the exception of the following specification and equipment amendments:

Dimensions Length 24ft (7,315mm)

Technical 80 Gallons (302.8 Litres) fuel tank.

Hull bottom is 1/8" (5mm) thick.

Single console assembly with hinged removable windshields, leaning post type seats, and 1/2" (12mm) additional hard points for installation of weapons.

Options Aluminum gunwales (7.62 pipe pedestal stand gun mounts), 100 gallon fuel tank upgrade, welded lifting eyes for air deployment, wired in fuse block and bow mounted MK16 modz tripod with hull reinforcement.
